

LOVE SHARMA

Full Stack Developer

Faridabad, Haryana | +91 84474 30775 | lovevashist3@gmail.com | linkedin.com/in/love-sharma

PROFESSIONAL PROFILE

B.Tech CSE student with hands-on full-stack development experience and current internship exposure at the Centre for Data for Public Good (CDPG), Indian Institute of Science, Bengaluru. Practical experience building Angular and React frontends, Node.js/Express.js backends, designing REST API flows, implementing routing, middleware and controllers, and integrating relational databases (MySQL, PostgreSQL, SQLite3) using mysql2, pg and Docker-based environments.

EXPERIENCE

Full Stack Developer Intern

Aug 2026 – Present

Centre for Data for Public Good (CDPG), Indian Institute of Science, Bengaluru

- Working on full-stack development tasks using Angular frontend and Node.js/Express.js backend technologies.
- Developing REST API flows using Express routes, middleware and controllers.
- Integrating MySQL with Node.js using mysql2 for database connectivity and data retrieval.
- Working with async/await and JSON-based API responses for frontend-backend communication.

PROJECTS

Todo List Application (Full-Stack)

React · Vite · Node.js · Express.js · PostgreSQL · Docker · Postman · REST API

- Built and hand-coded a full-stack CRUD Todo application end-to-end: React/Vite frontend, Node.js/Express.js backend, and a PostgreSQL database containerized with Docker.
- Designed 4 RESTful endpoints (GET, POST, PUT, DELETE) using parameterized SQL queries and a pooled connection (node-postgres Pool) for efficiency; tested every endpoint in Postman before frontend integration.
- Built a responsive React UI with controlled inputs and Axios API calls; independently debugged real bugs (stale list order, a persisted checkbox state) using DevTools and backend logs.

Smart City Weather Application

Angular · TypeScript · Node.js · Express.js · MySQL · mysql2 · REST API

- Built a full-stack weather application connecting an Angular UI with a Node.js/Express.js backend.
- Implemented REST endpoints with route-controller separation and middleware-based request flow, integrating MySQL through mysql2.
- Used async/await for database operations, returned records as JSON, and rendered database-driven data in Angular via HttpClient.

Pharma Inventory & Billing Management System

Python · Flask · SQLite3 · HTML5 · CSS3 · Jinja2 · CSV

- Developed a full-stack application for pharmacy stock, sales and billing operations with automated GST billing and invoice generation.
- Built inventory tracking with automatic stock deduction and bulk CSV import into a structured SQLite3 database.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C

Frontend: React, Angular, HTML5, CSS3

Backend: Node.js, Express.js, Flask

APIs: REST APIs, JSON, HTTP/HttpClient, Axios

Databases: PostgreSQL, MySQL, SQLite3, SQL

Tools & DevOps: Docker, Git, Postman, VS Code, MySQL Workbench

Core CS: DSA, DBMS, OS, Computer Networks

EDUCATION

B.Tech — Computer Science & Engineering, AKTU CGPA: 7.2 (through 5th Semester)	2023 – 2027
12th — CBSE 67%	2022 – 2023
10th — Haryana Board 86%	2020 – 2021

CERTIFICATIONS & HACKATHONS

- HackFest 2.0 — GDG Cloud New Delhi × Turgon AI
- Generative AI Mastermind — Outskill
- Vibe Hack 2.0 — Top 5,000 / 25,000 teams; Google Office finale
- Build with TRAE — One-Day Hackathon
- AptiCode Arena 2026 — C & Aptitude Trivia
